SUMMARY

AI engineer and B.Tech candidate graduating Summer 2026 with hands-on experience in retrieval-augmented generation, semantic search, and local LLM integration. Proficient in Python, TypeScript, and end-to-end AI system development-from prototyping and data pipelines to model evaluation and deployment. Passionate about applying emerging AI capabilities to build scalable, production-ready solutions.

CORE SKILLS

- **AI & ML:** Retrieval-Augmented Generation (RAG), LLMs (Ollama), FAISS, Semantic Search, Embeddings, Deep Learning, PyTorch, TensorFlow, scikit-learn, OCR (Tesseract)
- **Backend:** FastAPI, Node.js, Express.js, Python, Asynchronous APIs, Data Validation (Pydantic, Joi)
- **Frontend:** React 19, TypeScript, JavaScript (ES6+), Tailwind CSS 4, Vite, GSAP, Framer Motion, React Router, Axios
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Security & Auth:** JWT Auth, Bcrypt, RBAC, Helmet, Rate Limiting, Input Validation
- **Dev Tools:** Git, Docker, Swagger, VS Code
- **Soft Skills:** Problem-Solving, Research-Driven Development, System Design Thinking, Cross-Team Collaboration, Passion For Learning

EXPERIENCE

Jindal Power Limited

Jan 2026 - Mar 2026

AI & Full Stack Intern

PROJECTS

Jindal Operations Assistant (RAG-Powered Chatbot)

Enterprise AI Knowledge Management System

- Engineered a Retrieval-Augmented Generation (RAG) pipeline to process multi-format corporate data (PDF, Excel, PPTX, CSV) into a FAISS vector store for context-aware responses.
- Built a FastAPI backend for asynchronous streaming and on-premise LLM interaction via Ollama.
- Created a React frontend using Server-Sent Events (SSE) for real-time response streaming.
- Integrated OCR (Tesseract + Pillow) for scanned document ingestion and hierarchical categorization.
- Tech Stack: FastAPI, Python, React, FAISS, Ollama, Pandas, PyPDF, GSAP, Vite, Tesseract

Office Order Management System (HR-Tech Platform)

- Developed a secure full-stack web app using React 19 + Node.js to digitize HR office-order workflows.
- Designed MySQL schemas with RBAC and audit trails to manage departmental documents.
- Implemented JWT Auth, Joi validation, and Helmet for security and input protection.
- Built real-time dashboards for document tracking and analytics.
- Tech Stack: React 19, Tailwind CSS 4, Node.js, Express.js, MySQL, JWT, Bcrypt, Multer, Joi, Vite

JPL Pass Management System

Enterprise Workflow Automation Platform

- Designed a digital gate-pass approval workflow with React 19 + Node.js, automating manual material tracking.
- Added RBAC & JWT Auth for secure multi-user access and real-time analytics dashboards.
- Integrated Swagger UI for API documentation and Excel (XLSX) exports for reporting.
- Tech Stack: React 19, Tailwind CSS 4, Node.js, Express.js, MySQL, JWT, Swagger, Vite

CERTIFICATIONS

- **Artificial Intelligence & Machine Learning:** Microsoft Learn × FICE (20 hrs, Dec 2025)
- **Cloud Administration & Engineering:** Microsoft Learn × FICE (40 hrs, Dec 2025)
- **Microsoft Azure:** Microsoft Learn × FICE (25 hrs, Dec 2025)
- **Microsoft Copilot:** Microsoft Learn × FICE (35 hrs, Dec 2025)
- **Power BI – For Business Applications:** Microsoft Learn × FICE (20 hrs, Dec 2025)
- **Technology Job Simulation:** Deloitte (Forage Virtual Experience), Jul 2025
- **Data Analytics Job Simulation:** Deloitte (Forage Virtual Experience), Jul 2025

EDUCATION

Heritage Institute of Technology, Kolkata

2023 - 2027

Bachelor of Technology, Computer Science Engineering

Kolkata

•GPA: 7.53 / 10
